

## Analysis of Speed Indicator Device (SID) data for September 2022

The SID was located on Bluntisham Road just outside the “Colne” sign, facing towards Bluntisham, for 16 days between September 2<sup>nd</sup> & September 18<sup>th</sup> 2022. *(The SID collects data not only from approaching vehicles but also from those departing in the opposite direction; in the case of departing vehicles the speed is not displayed to the driver.)*

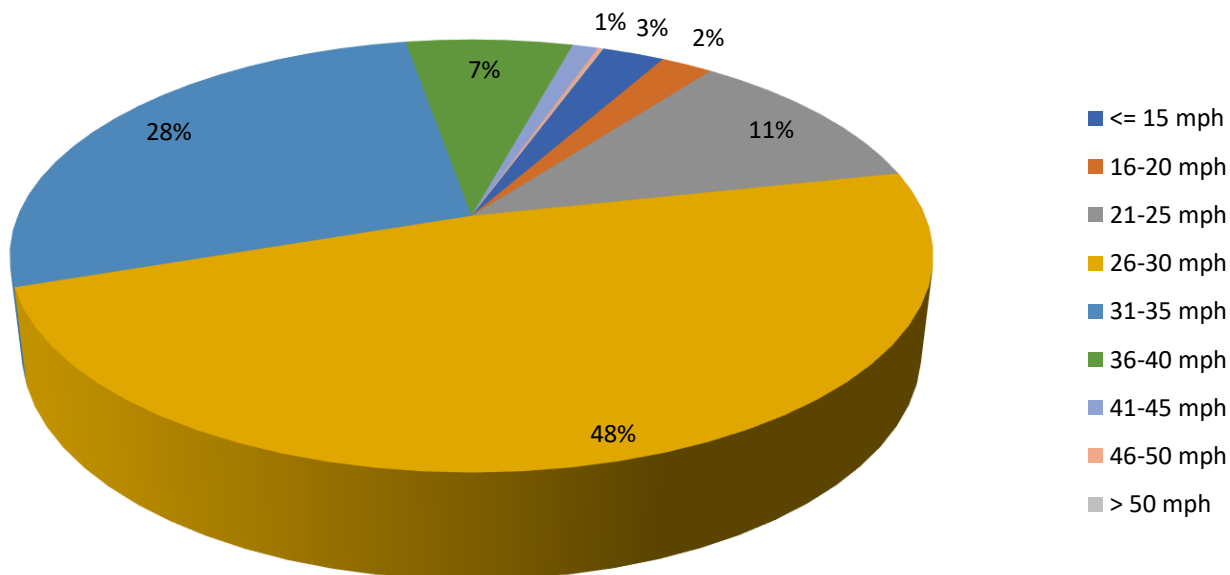

Over the 14 day period, just over one-third (35%) of all vehicles were recorded as exceeding the 30 mph speed limit. The average speed was 29 mph with 15% of vehicles travelling in excess of 34 mph.

### Vehicles approaching from Bluntisham

36% of vehicles were recorded as travelling in excess of the 30 mph limit with almost one in six (15%) recorded travelling at a speed greater than 34 mph. The average speed was 29 mph.

These figures show an improvement on those recorded in May 2022 at the same location when 38% of vehicles were recorded as exceeding the limit. The average speed then was also 29 mph.

The diagram, below, shows the distribution of vehicle speeds arriving from Bluntisham:

### Vehicles departing towards Bluntisham

*(The speed of vehicles travelling in this direction is not displayed to the driver and so the presence of the SID is likely to be less of a deterrent.)*

Over one-third (35%) of all vehicles were travelling in excess of the 30 mph limit with almost one in six exceeding 34 mph. The average speed was 28 mph.

These figures show a significant improvement over those of May 2022, with speed violations reducing from 39.8% to this month's 35%. The average speed has come down from 29 mph to 28 mph.

This diagram shows the distribution of vehicle speeds departing towards Bluntisham:
